### (54) TRAFIC SIGN POLE

#### (57)Abstract:

**PURPOSE:** To prevent secondary accidents with capability of self-restoration maintained against damages brought about by car collision, and to protect a light source mounted for improvement of visual recognition from shocks.

**CONSTITUTION:** In a traffic sign pole in which an opening on the upper end of a hollow pole body 10 carrying signs on its outer circumferential face is closed with a detachable cap 11 and the pole body is erected on a pedestal 12 for installation to the surface of a road, the pole body 10 is made up of an elastic body that absorbs shocks and is capable of making elastic restoration. A light source, made up by connecting a solar battery 13, a storage battery 16 and irradiation lamps 15 to a circuit substrate 18, is mounted to the pole body 10, and the irradiation lamps 15 are turned on, or turned on and off.

### LEGAL STATUS

[Date of request for examination] 02.12.1994

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 2555855

[Date of registration] 05.09.1996

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
